DRIVE THE LEGEND

5.0L V8 Engine

Expertly engineered to help maximise power from every compression, the Mustang GT's 5.0L V8 engine utilises a dual-fuel, high-pressure direct injection and low-pressure port injection system. Boasting 339kW of power and 556Nm of torque, this is the stuff of legends.

10-Speed Automatic SelectShift® Transmission

This is the best automatic transmission in any Mustang ever. Designed for optimum ratio progression and efficiency, it provides more accurate, quicker upshift and downshift capability. Now in the Mustang GT with steering wheel-mounted shift paddles included.

CUSTOMISE YOUR VIEW

Customizable 12-inch Digital Instrument Cluster with MyMode and MyColor

When you opt for the available 12-inch LCD digital instrument cluster, you can set your favourite drive settings and the MyMode system will remember them the next time you get behind the wheel. That even includes exhaust and steering preferences.

LOUDER, PROUDER

LED Lighting

The Mustang now features all-LED lighting including signature tri-bar DTRs, low and high beams, indicators, fog and tail lamps. There's even a 30 percent reduction in power consumption over the HIDs from the prior model year.

Active Valve Exhaust

Delivering an audible experience like never before, the Active Valve Exhaust system lets you choose exactly when you want to make your presence known. Four modes are available: Normal, Quiet, Track and Sport, tailoring the exhaust note for every occasion.

EXPERIENCE THE FUTURE

SYNC®3

Imagine controlling calls, music and more with just a touch and your voice. SYNC®3 lets you keep your hands on the wheel while it quickly responds to your spoken requests. Or use the responsive touchscreen in the center of your instrument panel to access its many helpful features. Bring the power of Siri to the Mustang. Also features 2 smart-charging USB ports to help keep your devices powered up and ready to go.
