

NEW FORD RANGER

Go Further

BORN READY

From back-breaking loads, punishing terrains, raging rivers, outdoor adventures, weekly chores and routines, daily commutes to keeping your family safe, Ranger is built smart for every lifestyle. On-road or off-road.

TOUGH IS NOT ENOUGH

To tackle the biggest jobs, you need more than a one-dimensional truck. You need breakthrough powertrain technology. Cutting-edge safety. Class-leading capability. You need a truck that does tough smarter.

NEW FORD RANGER
FOR EVERY LIFESTYLE

PACK LEADER

Packed with Ford's latest innovations, Ranger delivers where other tough trucks don't. Ranger comes with many first and only in-class features never before seen in a pickup truck.

First and only in-class 2.0L Bi-Turbo Diesel Engine which makes it the smallest yet most powerful engine in a truck.

First and only in-class 10-Speed Transmission giving the Ranger improved performance and fuel efficiency.

First and only in-class Autonomous Emergency Braking (AEB) detects pedestrians and vehicles in front of the truck, and alerts you with an audible warning. If you fail to react, it can automatically apply the brakes.

First and only in-class Forward Collision Warning detects a potential collision which triggers an audible warning and pre-charges and increases brake assist sensitivity to provide full responsiveness when you brake.

First and only in-class Lane Departure Warning vibrates the steering wheel if you unintentionally move out of your lane. If you still don't react, Lane Keeping Aid steers you back on track.

First and only in-class Semi-Automatic Parallel Parking (SAPP) scans available parking spots and practically parks itself.

First and only in-class Adaptive Cruise Control scans traffic and adjusts speed automatically. When traffic slows down, Ranger slows down too. When traffic clears, Ranger returns to your pre-set speed.

First and only in-class Easy Lift Tailgate incorporates a torsion bar to make lifting and lowering the tailgate effortless. Makes light work of big loads.

Each model variant has differences. Check the specifications to know more.

A REVOLUTION IN PERFORMANCE

Ranger's cutting-edge powertrain technology delivers the power and torque you need, without compromising efficiency.

10-Speed Automatic Transmission. First and only in-class transmission technology offers improved acceleration and more accurate, swifter gear changes.

2.0L Bi-Turbo

First and only in-class 2.0L Bi-Turbo diesel engine is a stroke of genius. Two turbochargers work independently to deliver extra power on demand, and best-in-class fuel efficiency.

Power - 213 PS
Torque - 500 Nm

2.0L Si-Turbo

Like its Bi-Turbo sibling, the 2.0L Single Turbo diesel engine offers impressive power, torque, and fuel savings. It also brings improved noise levels.

Power - 180 PS
Torque - 420 Nm

2.2L TDCI Diesel Engine

More power. Greater torque. Ranger's upgraded 4-cylinder 2.2L TDCI diesel engine pumps out the extra power you need to conquer any task.

Power - 160 PS
Torque - 385 Nm

INTELLIGENT DESIGN

The new, smarter Ranger delivers the durability and functionality you need to take on the world.

Looks the part. With bold new grille and front bumper, Ranger is more muscular than ever.

Shines bright. HID Headlights, Daytime Running Lights and LED Fog Lamps help you see the road ahead clearly, and make you more visible to other drivers. Plus, a cargo tray light gives you extra illumination when loading and unloading.

Powers up. We've also included a 230V outlet in the cabin, to charge your phone or plug in equipment virtually anywhere.

MEET YOUR CO-DRIVER

Work smarter. Play harder. Stay connected. Pair your smartphone to SYNC®3 to make calls, select music, and use your apps while you're on the move. Totally hands-free.

The 8-inch touchscreen display unit with Bluetooth, voice recognition and navigation supports smartphone-like functionalities, including swipe and pinch-to-zoom. Plus 2 USB ports and 6 Speakers make travelling in a Ranger a pleasure.

Real talk. The upgraded SYNC®3 system understands over 10,000 natural voice commands. So you can control SYNC®3 functions using just your voice.

Apple CarPlay, Android Auto and AppLink™ seamlessly connect to SYNC®3, allowing you to use your favorite apps on-the-go. Such as having your Waze navigation on the screen.

More intuitive. More functional. Easier to use. SYNC®3 brings next-level connectivity to your busy life.

PLAY SAFE. WORK SAFE.

Strategically placed cameras. Ultrasonic sensors. Sophisticated radar. Ranger uses state-of-the-art technology to keep you safer and in control.

Six airbags, including side and curtain airbags, along with a reinforced safety cell help make every journey safer for you and your passengers.

Electric Power-Assisted Steering improved manoeuvrability in all types of conditions. Steering is light and responsive for city driving, and heavier and easier to control at higher speeds.

E-Locking Rear Differential locks rear wheels together for maximum traction when driving on challenging surfaces or when it's difficult to keep both rear wheels on the ground at the same time.

Hill Descent Control takes control of braking for enhanced control on steep downhill grades.

BUILT FOR BIG THINGS

Ranger's high-strength chassis, torque-mighty engines, and superior suspension help you tow, haul and move with ease. From river crossing to challenging off-road terrain, Ranger is ready for anything.

Get loaded. Ranger's unbeatable 3500 kg towing capacity and 1000 kg payload let you handle big loads with complete confidence.

Rock-solid chassis. Ranger combines an ultra-high-strength steel chassis and a superior suspension design for smoother ride.

Unbeatable 800mm Water Wading means a river can't come between you and the task at hand.

237mm Ground Clearance helps you get to more places with greater ease.

4x4 Shift-On-The-Fly lets you shift between 2WD and 4WD High mode and Low mode on-the-go.

Tested in the real world. Ranger has survived harsh torture tests in the toughest climates and terrains.

WHEN THE GOING GETS ROUGH...

...Ranger's spacious and thoughtfully designed cabin keeps you in the comfort zone, no matter where the job finds you.

Take the rugged with smooth. Inside Ranger, the priority is space, comfort, and functionality. Controls are in plain sight and easy reach.

Get in. Stretch out. Ranger's comfortable seats are positioned for extra legroom. Larger doors and a smart positioning of the rear pillar in the Ranger Double Cab make it easier to get in and out.

Noise, Vibration, and Harshness (NVH) have been improved, without compromising payload or towing capacity.

Ranger's enhanced suspension system improves ride, steering, and handling.

Dual-Zone Electronic Automatic Temperature Control allows the driver and passenger to choose individual temperature settings. So everyone rides in comfort.
